

Digital ID Cards In BenefitsApp

BenefitsApp offers direct access to digitally rendered medical, vision & dental ID cards.

How it Works:

Within BenefitsApp, employees can see a list of their benefit elections, under the “My Benefits” icon. If the election has an ID card available, employees will see their personalized ID cards under the “ID Cards” icon.

BenefitsApp creates a fully customized digital rendering of the employees ID card from a PDF version of the physical ID card sent when sending your company census of employees and their benefit elections.
