

BenefitsApp's New Features

Spanish Translations

BenefitsApp has a Spanish version, translated to bridge the communication gap when it comes to benefits management and Spanish speakers.

Push & In App Messages

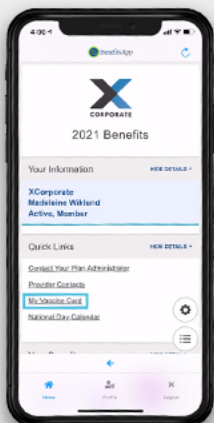

BenefitsApp offers powerful push and in-app messaging. It enables HR professionals with a direct channel to the employee's smartphone.

Digital Signature

Any documents you need to be signed by employees, such as , open enrollment documents or HR compliance documents, can be signed with a touch of their finger, right in the App.

- **Single sign-on (SSO):** Employees can securely authenticate with multiple applications such as MeMD , enrollment and HRIS systems with one set of credentials.
- **Employee Directory:** Click to call and click to email directory.
- **Company Calendar:** Important company events can be added to employee calendars.
- **Database Search:** Ability to search medications, pharmacies, or any searchable database.

Digital Vaccine Cards

- Safe and Secure place for employees to store their vaccine cards using BenefitsApp.
- Employees have access to their cards, whenever they need them.
- HR can access employee vaccine card files and track vaccination status of employees in a customized HR Portal (requires BenefitsApp HR Portal license).
